

CONFIDENCE CHECKPOINT #3: Before reviewing Cases L-T, please complete the following self-evaluation of clinical confidence levels for adult evaluation and treatment skills. It is recommended to download a copy for comparison with Confidence Checkpoint #4.

Emerging = You have no confidence in your ability to complete this clinical task.

Present = You have confidence in your ability to complete this clinical task with frequent assistance.

Developed = You have confidence in your ability to complete this clinical task with occasional assistance.

Consistent = You have confidence in your ability to complete this clinical task without assistance.

Identifying relevant red flags from available case history information.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Reaching logical conclusions from available case history information.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Calculating pure-tone averages and obtaining speech reception thresholds.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Administering word recognition testing at appropriate levels.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Interpreting word recognition scores.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Identifying when masking is needed for pure-tone air and bone conduction testing.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Selecting effective masking levels for pure-tone air and bone conduction testing.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Identifying when masking is needed for speech audiometry testing.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Selecting effective masking levels for speech audiometry testing.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Interpreting the audiogram.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Identifying when immittance testing is needed.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Interpreting tympanometry results.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Interpreting acoustic reflex testing.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Identifying when otoacoustic emission testing is needed.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Interpreting otoacoustic emission results.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Summarizing results of the test battery and providing potential etiologies.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Identifying when discrepancies are present.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Selecting appropriate referrals based on test results.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Conveying test results accurately to the patient and/or family.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Recognizing candidates for amplification.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Conveying appropriate treatment recommendations to the patient and/or family.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Selecting appropriate amplification and acoustic parameters.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------

Overall confidence level with performing a comprehensive audiometric evaluation.

Emerging	Present	Developed	Consistent
----------	---------	-----------	------------
